Name: Jiahao Yu
Email: jiahao.yu.2003@outlook.com
Country: United Kingdom
College/Company: University of Bristol
Specialization: Data Science

Data cleansing and transformation done on the data:

1. NA values:
   Substitute NA values to mode, since the NA values exist in categorical columns (values' dtype are object).
2. Outliers:
   Substitute outliers to median in numerical columns (Dexa_Freq_During_Rx and Count_Of_Risks).
